|---|---|
| **Frontend** | HTML5, CSS3, JavaScript, TypeScript, React.js, Tailwind CSS, Responsive Design |
| **Next.js** | Next.js, App Router, Dynamic Routing, Layouts, Reusable Components, Data Fetching, Server & Client Components |
| **Backend** | Node.js, Express.js, REST APIs, API Integration, CRUD Operations |
| **Database** | MongoDB, Database Management, Database Integration, Data Handling |
| **Authentication** | Better Auth, JWT, Session Management, Password Hashing, OAuth 2.0, Protected Routes, Sign In / Sign Up |
| **Tools & Deployment** | Git, GitHub, VS Code, npm, Vercel, Netlify, Deployment |

## EDUCATION

**EEE Student** | Daffodil

## DEVELOPMENT FOCUS

- Creating responsive, mobile-first interfaces for desktop, tablet and mobile screens.
- Structuring applications with reusable components, layouts and dynamic routes.
- Fetching and presenting data from APIs and implementing CRUD-based workflows.
- Working with database integration and authentication concepts.
- Using Git and GitHub for version control and deploying web applications.

## PROFESSIONAL INTERESTS

Full-stack web development, frontend engineering, backend development, API integration and building useful digital products.

# SELECTED PROJECTS

## PRACTICAL WORK & PROJECT HIGHLIGHTS

A selection of practical web projects demonstrating interface development, application structure and API integration.

### Bazar Dor

**MARKET PRICE TRACKING WEB APPLICATION**

A web application that helps users explore product prices and compare market rates through an organized interface.

- Organizes product information by category for easier browsing.
- Uses API data to present product and price information.

**Tech stack:** Next.js, TypeScript, Tailwind CSS, API integration

**Live Demo ■** | **GitHub Repository ■**

### FitLog

**FITNESS & WORKOUT TRACKING APPLICATION**

A fitness tracking application designed to help users explore workouts and manage their fitness plans.

- Presents workout information through reusable interface components.
- Uses structured pages and responsive layouts.

**Tech stack:** Next.js, TypeScript, Tailwind CSS

**Live Demo ■** | **GitHub Repository ■**

### Dev Stack Builder

**DEVELOPER TOOL**

A developer-focused application built to provide a clean interface and simplify the project setup experience.

- Built with reusable React components and TypeScript.
- Uses responsive layouts and utility-first styling.

**Tech stack:** React, TypeScript, Tailwind CSS, Vite

**Live Demo ■** | **GitHub Repository ■**
